

What is Medrina360 Care at Home?

The Medrina360 Care at Home program offers high-quality, home-based care for those who want to recover from the convenience of their home, post-hospital and skilled nursing facility stays. We bring expert clinicians and a dedicated concierge care team to you, ensuring every aspect of your health is managed with precision and care. Our service connects patients with physicians within 48 hours of discharge, utilizing in-person visits and telemedicine to enhance your health and well-being. Medrina360 is here to support you in the comfort and safety of your own home. Trust us to deliver comprehensive care where you feel most at ease—at home.

**This program is proven
to reduce preventable
readmissions by 30%**

The best life is yours to make.
We can help.

Comfort of Your Own Home**

Signing Up is Easy!

1 GET STARTED TODAY

Your Medrina care coordinator will discuss the benefits of the program with you.

2 ENROLLMENT

To ensure respect for privacy and individual preferences, patient consent will be obtained before enrollment in our program, affirming our commitment to transparency and ethical practices.

3 COORDINATION

We will coordinate with your relevant providers, caregivers, and home health team.

4 START FEELING BETTER

Upon discharge, you will be contacted by your assigned care coordinator and Primary Care physician. They will assess and design a plan specifically for you to get, and stay, as healthy as possible.

Who is Eligible?

Patients who are at high risk of readmission to a hospital.

How Do You Benefit from Medrina360 Care at Home?

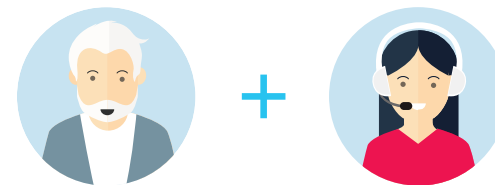

Medrina360 Care at Home extends your care outside the four walls of the hospital, inpatient unit or skilled nursing facility ensuring you receive the best possible clinical care to recover in the comfort of your home. With this program, you will have:

- Dedicated care coordinator nurse who understands your complete medical history
- Access to healthcare assistance 24/7
- Telemedicine with a physician within 48 hours of discharge home
- On-demand telemedicine visits available as needed
- Primary Care house call if needed to address concerns immediately *expanding and not available in every market yet
- Referrals to Primary Care, Cardiology, and Wound Care physicians, and Physical Medicine and Rehab services as needed
- Coordination of care between your pharmacy, specialists, testing centers, hospitals, etc.
- Help with all your healthcare-related tasks, such as scheduling appointments, requesting refills, and more

Program Duration:

Patients can stay on the program as long as needed.

How Patients Like You Use Medrina360 Care at Home

John Bloom (Patient)

A 77-year-old with congestive heart failure and chronic wounds, living home alone and enrolled in the Medrina360 Care at Home program by his Primary Care physician.

Jane (Care Coordinator)

A veteran nurse with years of experience in a geriatric setting is matched with John based on his conditions and specific needs.

How Jane Helps Patients Like John:

- Scheduling an appointment with a Medrina doctor (specialist) for John within 48 hours
- Sending John's medical records to the specialist
- Following up with the specialist after the visit to update the treatment plan
- Helping check for drug interactions between John's new and existing medications
- Checking in on John to make sure there are no issues with his new medication and treatment plan

What Does it Cost?

Eligible patients can enroll in this program at no additional cost; insurance verification is required before enrollment, and most major insurance plans are accepted.
